

WARNING

**When the glass shade is assembled with the lampholder,
the whole verticality of the product must be respected.**

During the process,

The cord anchorage must be glued straightly to the bottom of the metal candle,

In the metal candle, the cap lampholder must be glued straightly,

The lampholder is also straight with regard to the glass shade.

On the previous picture,

It means that the 4 red lines must be parallel between them, to be sure, when the glass shade is assembled, the suspension stays straight.
